CAREER SUMMARY

Currently a System Administrator supporting applications and servers for the ETL and BI teams. I have experience in systems administrations, help desk support and IT operations. I continuously look for ways and resources to learn and improve myself both personally and professionally. With the knowledge I have and seek, I aim to provide positive value to teams I work with and to society.

WORK EXPERIENCE

University Of Missouri

System Administrator

Nov 2022 – Current

Columbia, MO

Currently serving as a System Administrator with primary responsibility for the administration of critical applications supporting the Enterprise Data Warehouse and analytical functions for the UM System's ETL and BI platforms.

- Collaborate with different teams both internal and external to install, configure, upgrade, maintain, tune, troubleshoot and provide technical support for applications.
- Automating runtime of processes and applications reducing setup time and manual repetition of the same work.
- Maintaining documentation used for installation, maintenance and support of the applications, reducing troubleshooting time by 15% and ensuring the applications are administered in the same way in the future.
- Maintaining the cloud on-premise gateway for Power BI, which is responsible for synchronization of reports between on-premise data and cloud data.
- Monitoring the infrastructure used, making sure servers are up and running, using enough computer resources and making sure there are enough licenses for employees to use for the applications they require.

MidwayUSA

Help Desk Technician

Jan 2021 – Nov 2022

Columbia, MO

At MidwayUSA, I worked as part of the help desk team to provide the right tools and support for my customers, the employees, to do their job.

- Provisioned PCs, laptops, phones, handhelds, and other company technology inventory for employees to ensure they had the tools they needed upon start of and throughout their employment.
- Identified, diagnosed, and resolved hardware and software issues reducing downtime caused by equipment failure.
- Participated in the on-call rotation to provide after work hours assistance to employees which reduced downtime and kept employee assistance uninterrupted.
- Equipped a brand-new distribution center with new technology inventory 2 weeks ahead of schedule, giving time for process testing and company tours, increasing management satisfaction on the work done.

- Enforced 2FA/MFA and other security standards on remote workstations and Azure active directory accounts, which helped keep company resources and employees safe and reducing area of cyber-attacks.

See-Saws-Run, LLC

IT Support Specialist

Oct 2018 – Jan 2021

Green Castle, MO

- Provided in-house technical support and resolving any technical issues or concerns.
- Performed diagnostics and troubleshooting hardware and software issues and make the appropriate recommendations and repairs.
- Provided printer support through maintenance & configuration of printers, and installation of software updates, which reduced downtime and improved the rate of product shipment.
- Researched for the latest and cheapest laptops, and peripherals reducing computer supply costs by \$700 and improving quality of inventory.
